The SGVWBA, Inc., accepts no responsibility for errors in this book, but places the responsibility on the individual bowler to use her correct and highest known average.

Averages of bowlers who are members of other associations and bowled in San Gabriel Valley leagues are listed in the back of the book. These averages are for information only and DO NOT indicate that they are the highest averages of these bowlers.

Official averages are based on 21 or more games in one sanctioned league. ** indicates the league was sanctioned in another local association.

Averages for leagues starting their schedule in the summer and extending past October 1st will be considered as official averages for the current average book.

The averages in this book have been compiled from the alphabetical lists submitted by the league secretaries. Only the members with 21 games or more are recorded in this book, as this is the official book average. If any name and average does not appear herewith, either the league secretary failed in his/her duty to submit same or it was received too late for publication. If any errors are discovered, it is requested they be reported to the Association Secretary in order that the necessary corrections may be made.

Although many league secretaries failed to submit average lists or submitted them from incorrect dates, the association was able to secure league sheets for all but the following.
